

AI-Powered AWS Developer Bootcamp

Python Mastery with AWS Cloud Certification & Job Placement

Duration: 5 Weeks | **Mode:** Live + Hands-On + Recordings | **Schedule:** Dec 01 – Dec 31, 2025

Program Overview

This 5-week immersive CloudBerry bootcamp prepares you for **real Python + AWS developer roles**, with a strong emphasis on **job applications, recruiting strategy, and placement support**.

You'll learn to design, build, and deploy scalable cloud applications using **Python, Flask, SQL, AWS services, CI/CD pipelines, and AI integrations**. Alongside technical learning, you'll receive **resume optimization, LinkedIn branding, mock interviews, GitHub portfolio enhancement**, and guided job application coaching — everything needed to become a **competitive candidate in the cloud job market**.

By the end of the program, you will:

- Build and deploy a complete **Flask + AWS + AI project**
 - Understand **EC2, S3, RDS, IAM, Lambda, CodePipeline, Boto3**
 - Implement **CI/CD pipelines** and automate deployments
 - Build a **strong GitHub portfolio** of cloud projects
 - Be job-ready for roles like **Python Developer, AWS Developer, Cloud Engineer**
 - Complete CloudBerry's **Job Placement Track**
-

Certifications You Will Earn

- **AWS Developer Associate Certificate**
 - **CloudBerry AWS Developer Certification**
-

Job Placement Services (Included)

This bootcamp includes CloudBerry's **Enhanced Job Placement Track**, designed to help you confidently secure Python/AWS developer roles.

You will receive:

- **ATS-Optimized Resume** tailored for Python/AWS roles
- **LinkedIn Profile Optimization** with SEO-driven keywords
- **Technical + Behavioral Mock Interviews** with feedback
- **GitHub Portfolio Review & Enhancement**
- **Job Application Strategy** (daily recruiter outreach + job search plan)
- **Optional CloudBerry Internship** (3–6 months, project-based)
- **Continued Support Until You Get a Job**

You'll graduate not only skilled — but **market-ready and competitive** in cloud engineering.

Real Success. Real Stories: [Testimonial Videos](#)

5-Week Curriculum

WEEK 1 — Python Foundations & Cloud Mindset

Goal: Master Python syntax and build the foundation for cloud development.

You'll Learn:

- Python basics, loops, functions, data types
- Working with files (JSON, CSV)
- Packages & virtual environments
- Git and GitHub workflow
- Introduction to Cloud & AI concepts

Hands-On:

- ✓ Build a CLI mini-project and publish it on GitHub
-

WEEK 2 — APIs & Databases with Flask

Goal: Build REST APIs and connect them to SQL databases.

You'll Learn:

- Flask routes & blueprints
- Environment configuration
- CRUD operations (SQLite/MySQL/PostgreSQL)
- SQLAlchemy ORM

- Basic authentication
- API testing with Postman

Hands-On:

- ✓ Develop a full Flask CRUD API and test it using Postman
-

WEEK 3 — Deploying on AWS (EC2, S3, RDS, IAM)

Goal: Take your Flask app live on AWS and manage cloud infrastructure.

You'll Learn:

- IAM roles & policies
- EC2 setup + SSH access
- Deploying Flask on EC2 with RDS
- S3 for storage & static content
- VPC & Security Groups fundamentals
- AWS CLI & Boto3

Hands-On:

- ✓ Deploy your first full-stack application on AWS
-

WEEK 4 — CI/CD Automation & AI Integration

Goal: Automate deployments and add AI capabilities.

You'll Learn:

- AWS CodePipeline, CodeBuild
- GitHub Actions (CI/CD)
- Lambda + API Gateway
- Event-driven architecture
- AWS AI Services: Rekognition, Comprehend, Bedrock
- Integrating OpenAI/Bedrock APIs with Flask

Hands-On:

- ✓ Build a CI/CD pipeline
 - ✓ Add an AI feature (image AI or text summarizer)
-

WEEK 5 — Monitoring, Job Prep & Capstone Project

Goal: Operate like a Cloud Engineer and build your showcase app.

You'll Learn:

- AWS CloudWatch metrics & logs
- AWS X-Ray for tracing
- Cloud cost optimization
- Resume & LinkedIn polishing
- Mock interviews
- AWS certification prep
- Job application strategy

Internship Onboarding:

- ✓ Optional 6-month project support internship

Capstone Project:

AI-Powered Cloud App

(e.g., Sentiment Dashboard, Image Classifier, Chatbot)

Includes: Flask backend + AWS deployment + AI integration + CI/CD pipeline

Final Deliverables

- Fully deployed AI Cloud App on AWS
 - GitHub Portfolio Repository (multiple projects)
 - Interview Readiness Coaching
 - CloudBerry Completion Certificate
 - Job Placement Support: Resume + LinkedIn + Interviews + Job Applications
-

Ideal For

- Software Developers & QA Engineers transitioning to Cloud
 - Fresh Graduates specializing in Python & AWS
 - Anyone pursuing **AWS Developer Associate** or **AI Practitioner** certification
 - Professionals looking for cloud-based career advancement
-

Ready to Turn Curiosity Into a Career?

Join CloudBerry's **AI-Powered AWS Developer Bootcamp** and become the next success story in Python, Cloud, and AI engineering.

“You won’t just learn tools — you’ll build real projects that employers want to see.”
