

Crafting A Data Visualization Portfolio

By Jennifer Newsome

Computer Coach, September 19, 2024

Resources & Shared Links

Data Storytelling:

Professional Skill: Derive insights from data through the use of visual elements.

[EdwardTufte.com](https://edwardtufte.com)

Edward Tufte's official website featuring his work on data visualization, including books, essays, and forums focused on the design of complex data presentations.

[StorytellingWithData.com](https://storytellingwithdata.com)

A blog and resource hub by Cole Nussbaumer Knaflitz, offering insights, workshops, and tips on effective data storytelling and visualization techniques.

[InformationIsBeautiful.net](https://informationisbeautiful.net)

David McCandless's website is dedicated to creating visually stunning infographics and data visualizations that make complex information more understandable and engaging.

[FlowingData.com](https://flowingdata.com)

Nathan Yau's platform that explores how data visualization and analysis can tell compelling stories, offering tutorials, insights, and inspiration for data enthusiasts.

VisualisingData.com

Andy Kirk's website provides a comprehensive resource for data visualization professionals, including tutorials, book reviews, and discussions on best practices.

WTF Visualizations

A collection of confusing, misleading, or just plain bad data visualizations found online, showcasing how not to present data.

junkcharts.typepad.com

A blog by Kaiser Fung that critiques bad data visualizations, analyzing what went wrong and offering suggestions for how to improve them for clarity and accuracy.

Terrible Infographics

A Tumblr blog dedicated to showcasing poorly designed infographics, with commentary on why they fail to communicate their intended messages effectively.

reddit.com/r/dataisugly

A Reddit community where users share and discuss poorly executed data visualizations, offering critiques and insights into what makes these examples ineffective or misleading.

Your Tools Team:

Professional Skill: Familiarity with a wide range of commonly used applications

- Power Players
 - Excel, Tableau, Power BI, SQL, Google Analytics, Salesforce / CRM
- Programming Players
 - Python, Jupyter, SPSS, MatLab, SAS, Stata, Javascript, Chartist.js, D3.js, GGPlot
- Creative Players
 - Google Data Studio, Looker, Infogram, Flourish
- Supporting Players
 - BQlik Sense, Klipfolio, Domo, Gratana, FusionCharts, DataWrapper, Chart Blocks, Blikview
- Literally hundreds of others

[VisualisingData.com/Resources/](https://visualisingdata.com/resources/)

A collection of some of the many data visualization (and related) tools, applications, toolkits, libraries, platforms, and packages. And has been curated since around 2010 to provide readers with as current and as comprehensive a view as possible of the visualization technology landscape.

[The Chart Maker Directory](#)

A The Chartmaker Directory is an attempt to gather and organize a useful catalog of references that will offer answer to the most common questions in data visualization:

If I want to make a certain chart with which tools can I make that?

If I want to invest in a given tool which charts will it enable me to make?

If I want to make a specific chart in a given tool, but don't know how to create it, can I find a solution to help me?

All the Data: Challenges

Professional Skill: Assess challenges and apply knowledge to overcome problems

[SOTI Challenge 2023 \(Data Visualization Society\)](#)

Organized by the Data Visualization Society, this competition focuses on creating innovative and effective visual representations of complex data.

[Tableau's Makeover Monday](#)

A weekly event encouraging participants to improve a given dataset visualization and share their creations. It fosters community and skill-building in data visualization.

[Tableau Iron Viz](#)

The world's largest data visualization competition, where participants compete to tell compelling data stories within a 20-minute window using the same dataset.

[Workout Wednesday](#)

A weekly challenge designed to help individuals develop their Tableau and Power BI skills by recreating a data-driven visualization.

[DataQuest Data Science Projects](#)

DataQuest provides guided projects that help participants build their portfolios while

learning essential data science skills.

Storytelling with Data (SWD) Challenges

Monthly challenges designed to improve data storytelling and visualization skills by solving real-world problems.

Viz for Social Good

A platform where volunteers use data visualization to help non-profit organizations communicate their data and further their causes.

Information is Beautiful Awards

An international competition that celebrates excellence in data visualization and infographics.

Kaggle Competitions

Data scientists and analysts to participate in open-source data competitions. These competitions provide valuable experience and exposure to real-world data problems.

All the Data: Open Source Data

Beautiful News - Information is Beautiful

[Beautiful News](#) is a visually compelling platform that presents data in an engaging and accessible way. It offers open-source data sources with an emphasis on positive global trends and changes.

Kaggle Datasets

[Kaggle Datasets](#) provides a wide variety of open-source datasets, covering various industries and research fields. It is an excellent resource for data enthusiasts looking to find comprehensive datasets for their projects.

Fun Beginner-Friendly Datasets - Kaggle

This [Kaggle code resource](#) offers datasets that are perfect for beginners looking to enhance their skills with friendly and fun data challenges.

Google Dataset Search

[Google Dataset Search](#) is an invaluable tool for discovering open-source datasets

across the web. It connects researchers and enthusiasts with relevant data for academic and professional use.

Data.gov

[Data.gov](#) is the official U.S. government website that offers a vast collection of open-source datasets from various federal agencies, covering topics such as climate, education, and public health.

Survey Datasets - Data World

[Data World](#) specializes in open-source survey datasets, ideal for users looking to analyze societal trends, behaviors, and opinions based on comprehensive survey data.

Spotify Research

[Spotify Research](#) provides insights and open-source data into the world of music and audio streaming. This platform is tailored for research projects related to user listening habits and trends.

Download Personal Data

Download your own personal data from platforms like Netflix, Facebook, Spotify, and Google, analyze their personal data insights.

Data Science Projects - Dataquest

[Dataquest](#) offers data science projects with open-source datasets. It's a great platform for users looking to practice and apply their skills in real-world scenarios.

Awesome Public Datasets - GitHub

[Awesome Public Datasets](#) is a comprehensive GitHub repository that curates high-quality open-source datasets from various domains, making it a valuable resource for data-driven projects.

Video Game Datasets

[Game Datasets](#) on GitHub offers a selection of open-source datasets specifically related to video games, including player behavior, game mechanics, and industry trends.

Portfolio Time:

Professional Skill: Collaborate, communicate, and share knowledge and expertise

Data & Coding Platforms

- **Tableau Public**
A free platform to create, share, and explore data visualizations with Tableau's tools.
- [Kaggle](#)
A platform for data science competitions, code sharing, and learning data analytics.
- [GitHub](#)
A platform for version control and collaboration, used for hosting open-source software projects.
- [Medium](#)
An online publishing platform where people can share ideas and stories, often used by professionals for personal blogs.
- [Data Visualization Society](#)
A community for professionals and enthusiasts who work in data visualization, offering resources and networking opportunities.

Online Portfolio Platforms

- [WordPress](#)
A popular open-source platform for creating customizable websites and portfolios.
- [Wix](#)
An easy-to-use website builder offering customizable templates for portfolios and websites.
- [Squarespace](#)
A design-focused website builder ideal for creating professional portfolios and business sites.
- [Weebly](#)
A simple drag-and-drop website builder for portfolios and small businesses.
